

The 4×8 kitchen bed

One 4×8 ft raised bed in four blocks: cherry tomatoes, basil, lettuce and carrots. Laid out by GrowDraft's planting engine at each crop's real spacing.

Grid: 30 cm squares, about 1 ft

PLANT KEY

Crop	Plants	Spacing
T Tomato Cherry	2	45 cm 18 in
B Basil Genovese	12	20 cm 8 in
L Lettuce Romaine	8	25 cm 10 in
C Carrot Nantes	60	10 cm 4 in
Total	82	

SOWING

Tomato: start indoors 6 to 10 weeks before your last frost; plant out around your last frost date.

Basil: sow in May to Sep (planting months in our plant data, northern hemisphere).

Lettuce: sow in Feb to May and Sep to Nov (planting months in our plant data, northern hemisphere).

Carrot: sow in Mar to May and Aug to Sep (planting months in our plant data, northern hemisphere).

Timings: SeedsNow seed packets (snapshot 2026-09-25), counted from your average last frost. Suggestions, not promises.

COMPANIONS

Tomato and basil are listed as good neighbours.

Tomato and carrot are listed as good neighbours.

Lettuce and carrot are listed as good neighbours.

From the companion lists in GrowDraft plant data.

Open this plan in GrowDraft
and fit it to your yard.

Scan the code with your phone camera. The bed opens in the free planner, where you can resize it, swap crops and place it in your own garden.
